has AI ImpactCover

29/05/2026

**With AI ImpactCover, you are using AI in an environmentally conscious way. You are directly supporting the restoration of legally protected native forests that will remove your emissions as they grow. With AI ImpactCover (light to moderate) an additional riparian tree has been planted at the Strzelecki Nature Link to support water quality enhancement in the project's waterways.**

Greenfleet is a leading not-for-profit environmental organisation that has delivered climate action for nearly 30 years. We are focused on protecting our climate by restoring native forests that remove carbon, conserve biodiversity and build critical habitat for native wildlife.

Since 1997, Greenfleet has planted over 11.7 million native trees to create more than 580 legally protected forests. Protected for up to 100 years, these forests will remove 6 million tonnes of carbon as they grow.

Thanks to you, Greenfleet will continue protecting our climate, addressing critical deforestation and growing native forests.

Together, we are growing our forests, restoring nature, and growing climate hope.

Warm regards,

Wayne Wescott | Greenfleet CEO
